Summary

Senior Frontend Engineer specializing in building scalable web products and real-time systems. Experienced in owning features end-to-end across frontend architecture, API integration, performance optimization, and production deployments. Strong focus on maintainability and product reliability and minimizing production issues in high-traffic environments. Open to Bangalore-based and remote roles.

Professional Experience

Doodleblue Innovations

Software Engineer (Senior), Bengaluru

02/2024 - 04/2025

- Built and scaled the frontend architecture for an institutional crypto trading platform.
- Integrated data displays for real-time trade lifecycle workflows, inventory monitoring, and operational insights
- Implemented WebSockets with fallback polling to ensure UI consistency during connection drops
- Optimized high-frequency updates to reduce UI lag during live trading activity
- Built a drag-and-drop configurable report builder with role-based customization, reusable templates
- Generated PDF reports and complex data visualizations from normalized API responses
- Mentored juniors, enforced standards, conducted code reviews, and improved team delivery speed.

Doodleblue Innovations

Senior Software Engineer, Bengaluru

02/2022 - 06/2023

- Owned frontend development of React/Next.js applications across insurance, logistics, and enterprise domains including a cross-border trade enablement platform digitizing documentation for import/export workflows.
- Implemented multilingual architecture using i18next and full Arabic localization and LTR/RTL rendering.
- Improved page performance by 30–45 percent through code splitting, caching, and rendering optimizations.
- Designed reusable UI components used across 4+ products and collaborated on GraphQL/REST integrations.

Frshr Technologies

Front End Developer - Intern, Mumbai

11/2021 - 02/2022

- Developed a gamified learning platform integrating backend ML prediction outputs into user workflows
- Implemented JWT authentication login/signup flows, protected routes and global state management
- Improved application stability by structuring predictable state and API handling

Home Center, Vertical Growth Insurance

Freelance Front End Developer, Mumbai

- Home Centre India (Sep 2021 – Dec 2021): Built an order tracking web app
 - Vertical Growth (Sep 2019 – Jan 2020): Built a PWA insurance web app with premium calculation and secure APIs.
-

Education

Masters Degree in Computer Science

S.K. Somaiya College, Somaiya Vidyavihar University, Mumbai, Maharashtra
04/2022

Bachelor's Degree in Computer Science

Mumbai University, Kalyan, Maharashtra
10/2020

Selected Projects

Key projects showcasing my work in secure systems, scalable architecture, and intuitive UI.

Real-Time Chat App (Fullstack Personal Project)

Tech: Next.js, TypeScript, Node.js, GraphQL, PostgreSQL, Socket.io

GitHub: https://github.com/prabhatkubal/chat_application

- Built a secure real-time chat application using Next.js and PostgreSQL with a scalable full-stack architecture.
 - Designed GraphQL APIs (Apollo Server) and Socket.io for efficient data fetching and real-time updates.
 - Implemented JWT-based authentication, protected routes, and secure cookie handling.
 - Modeled relational data and built modular, maintainable UI components.
-

Track & Trace (Freelance Frontend Developer)

Github: [Track & Trace](#)

- Built an e-commerce order tracking web app using React with reusable UI components
 - Implemented real-time order status updates and smooth scrolling components.
-

Skills

Frontend Libraries & Frameworks: React.js, Next.js, Redux Toolkit, Context API, Hooks, SSR, CSR, Component Architecture, Design Patterns

Backend & Data: Node.js, GraphQL (Apollo), REST APIs, PostgreSQL, WebSockets, Socket.io

Markup & Style: HTML5, CSS3, SCSS/SASS/LESS, Material UI, Styled Components, Tailwind, Bootstrap

Tools & DevOps: Git, AWS, Docker, CI/CD, Environment configuration

Testing & Quality: React Testing Library, Jest

Languages

English, Hindi, Marathi

Certificates

Responsive Web Design - freeCodeCamp - July 15 2021

Awards

1st Place in TechKrida'21 Web Dev Competition - May 2021
